

AI Interview Coach

Hackathon Project

Presented by: Athmakuri Saipravalika

Title:

Problem Statement

- Many students struggle to prepare for technical interviews due to lack of practice, guidance, and personalized feedback.
- Traditional preparation methods do not provide real-time evaluation or improvement suggestions.

Title:

Proposed Solution

- Content:

AI Interview Coach is an intelligent platform that conducts mock interviews, evaluates answers, and provides personalized feedback.

The system helps students improve their interview skills and confidence.

Title:

Key Features

Content:

- User Registration and Login
- Topic Selection (Python, SQL, Flask)
- Mock Interview Sessions
- AI-Based Evaluation
- Performance Scoring
- Personalized Feedback
- Progress Tracking

Title:

Project Workflow

- Content:
- User Login
- ↓
- Select Topic
- ↓
- AI Generates Questions
- ↓
- User Answers Questions
- ↓
- AI Evaluates Answers
- ↓
- Score and Feedback

Title:

Technology Stack

- Content:

Frontend:

- • HTML
- • CSS
- • JavaScript

Backend:

- Python
- Flask

Database:

- • SQLite

AI:

- • Large Language Model (LLM)

Title:

Expected Impact

Content:

- Improves interview preparation
- Builds confidence
- Provides instant feedback
- Helps students become job-ready
- Makes interview practice accessible to everyone

Title:

Future Enhancements

Content:

- Voice-Based Interviews
- Resume Analysis
- Company-Specific Questions
- Career Guidance
- Multi-Language Support

Title:

Thank You
